FORENSIC SCIENCE INVESTIGATIONS.
Tampa, FL
RalphEMoon@gmail.com

EDUCATION

Post-Doctoral Fellowship, University of South Florida, Department of Chemistry 1981-1982; Ph.D. Department of Biology, University of South Florida, 1980; MS Department of Biology (Botany), University of South Florida, 1975; BS Department of Biology, Western Michigan University, 1972

EXPERIENCE

43 years

REGISTRATIONS

- Certified Indoor Air Quality Professional (CIAQP)
- Certified Mold Assessor (MRSA 110)
- Certified Hazardous Materials Manager (CHMM)

AFFILIATIONS

Member: Board Member, IICRC Science Advisory Counsel, 2025 Science Advisory Counsel, Cleaning Industry Research Institute, 2023-2025 Institute of Environmental Studies (IES) **Board of Directors**, USF; Restoration Advisory Board, MacDill AFB**, Co-Chairman**, 1995-2004; St. Petersburg Diocese Real Estate Advisory Board, 1999-2014; Hillsborough County Minority Business Citizen Participation Committee, **Chairman**, 2000-2012; ASCE Forensic Engineering Committee; City of Tampa Historic Preservation Committee, **Commissioner** 2017-2019 Cleaning Industry Research Institute Research Advisory Council 2019-2022

Ralph E. Moon Consulting, LLC

Ralph Moon, Ph.D., CIAQP, CHMM

Owner

Dr. Moon specializes in the determination of the cause, origin and duration of water losses associated with insurance claims. In this capacity he conducts site investigations and, when necessary, serves as an expert witness representing either the defendant or plaintiff when an insurance claim seeks resolution in court. Dr. Moon supports his opinions with results obtained from published research studies of which he is a contributing author.

FORENSIC SCIENCES

WATER DAMAGE INVESTIGATIONS OF INSURANCE CLAIMS

PROJECT MANAGER

Dr. Moon has conducted numerous water damage investigations during 21 years of insurance claims work.

GROUNDWATER INVESTIGATIONS/RISK ASSESSMENT | COMPUTER MICROPROCESSOR MANUFACTURER

CO-PROJECT MANAGER | ALOHA, OR | 1996-2003

The historical release of volatile organic compounds at a solvent storage area prompted a hypothetical risk evaluation of indoor air quality and recovery of ground water plume. Soil gas sampling was performed to detect the presence of volatile organic chemicals. Ground water recovery, microbial treatment technology treatment implemented to attain risk based remediation criteria.

MOLD ASSESSMENT COUNTY LIBRARY | HILLSBOROUGH

PROJECT MANAGER | TAMPA, FL | 1998

This library was situated in an Oak Hammock which limited the amount of available sunlight and encouraged humid conditions. Inspection of the ceiling tile and steel supported crossbeams revealed the abundant growth of mildew parallel to the fluorescent lighting fixtures. Inspection of the building revealed that it was under a negative pressure which allowed the interception of outside humid air to be drawn through the building vents, across the plenum and through the ceiling lights. It was suggested that the building's HVAC system be balanced to achieve a positive pressure. In addition, corrections were made to the air conditioning system to allow the HVAC system to run until the indoor air within the building met a particular humidity requirement.

INDOOR AIR QUALITY | BRITISH-BASED OIL COMPANY

PROJECT MANAGER | NASSAU, BAHAMAS | 1997-1998

Negative pressure within these administrative offices and the proximity of the offices to emissions from a high sulfur fuel boiler resulted in the interception of off gas products and indoor air quality complaints. Dr. Moon performed occupation health sampling and determined that the indoor air quality closely

paralleled the outdoor air measurements exceeded the U.S. Occupational Safety and Health Criteria.

INDOOR/OUTDOOR AIR QUALITY | BAHAMIAN LOCATED PHARMA CO.

PROJECT MANAGER | GRAND BAHAMA, FREEPORT | 198-1998

Severe groundwater contamination resulted in the production and release of hydrogen sulfide vapors that penetrated manufacturing and office facilities at this pharmaceutical plant. The project was initiated following the dissolution of phone lines to the facility and the inability for site workers to occupy portions of several buildings. Dr. Moon's evaluation of subsurface gases revealed that the subsurface conditions were anaerobic and would require both soil vapor extraction and restoration of groundwater. The 10 acre parcel was returned to normal conditions within two years; groundwater conditions were returned to USEPA drinking water standards in six years.

RISK ASSESSMENT | COMPUTER MICROPROCESSOR MANUFACTURER

CO-PROJECT MANAGER | DUPONT, WA | 1997

The proposed construction of a micro processing facility at this former munitions plant prompted an evaluation of inorganic gases and the composition of fugitive dust. The air sampling data was used to perform a risk assessment of air quality residing in the buildings after construction. The outcome of the sampling revealed that conditions were within acceptable occupational safety and health criteria.

AFFIRMATION OF LEGAL TESTIMONY

- William R. Peek and Stacey Peek Appellants, v American Integrity Insurance Company of Florida, Appellee, Case No. 2D13-780 In the District Court of Appeal of Florida Second District. Dr. Ralph Moon, Expert Witness

ADDITIONAL EDUCATION/TRAINING

- Twenty-Sixth Westford Symposium on Building Science, Westford, Massachusetts, August 5-7, 2024.
- Twenty-Fifth Westford Symposium on Building Science, Westford, Massachusetts, July 31-August 2, 2023.
- Andrew Ask Building Science Symposium, Naples, Florida, Joyce Owens, Joe Lstiburek, Kimberly Llewellyn, Bryan Orr, John Tooley, January 24 and 24, 2023.
- Sampling and Characterizing Wildfire Smoke Residues, Cleaning Industry Research Institute, November 17, 2021
- Twenty-Third Westford Symposium on Building Science, Westford, Massachusetts, August 5-6, 2019.
- Roof Failure Analysis: Dan White and John Walker, Asphalt Product Oil Company (APOC), Tampa, Florida March 3, 2017
- Building Envelope Leaks from Miami to Connecticut: Building Sciences, Mark Williams, AIA, Williams Building Diagnostics, Bradenton, Florida, March 2, 2017
- Weather Forecasting Methods: Daniel Noah, National Weather Service, Ruskin, Florida, March 2, 2017
- Twentieth Westford Symposium on Building Science, Westford, Massachusetts, August 1-4, 2016
- Fungal Ecology of the Indoor Environment, Dr. Chin Yang, Prestige EnviroMicrobiology, July 15, 2016
- Water Intrusion & Microbiological Contamination, Dr. Chin Yang, Prestige EnviroMicrobiology, July 15, 2016

- Residential Pipe Failures: Copper, Galvanized Steel, PEX, Don Dunn, Master Plumber, My Plumbing Company, July 14, 2016
- Foam Insulation: Installation Deficiencies, John LaPotaire, CIEC, Indoor Air Quality Solutions, Tampa, FL, December 3, 2015
- Expert Witness Training, Doug Grose, Merlin Law Group, Tampa, Fl, December 4, 2015
- Nineteenth Westford Symposium on Building Science, Westford, Massachusetts, August 2-5, 2015
- Understanding Moisture Performance of Wood: Introduction to Durable Design and Construction, Tampa, Florida, Ron Anthony, Wood Works Wood Products Council, Tampa, Florida, May 19, 2015
- Building Sciences Continuing Education Series, Guest Speaker Joe Cox - Chilled Water Fundamentals, Proposed Mold Assessor Requirements, Daubert Standard, Understanding Concrete, Industrial Hygiene, Airflow, Large Building Air and Water Intrusion, Remediation, Corrosion Study Test Method and Tile Study Method, Tour of Yuengling Plant Mechanical Systems (Tampa, Florida), January 22-23, 2015
- Introduction to Psychometrics: ASHRAE Chapter Meeting, Tampa, Florida, November 11, 2014
- Eighteenth Westford Symposium on Building Science, Westford, Massachusetts, August 4-6, 2014
- Icynene Insulation: Application and Installation, Tampa, Florida January 24, 2014.
- American Bar Association, Mid-Winter Meeting: Expert Witness Preparation, January 31, 2013, Naples, Florida
- Seventeenth Westford Symposium on Building Science, Westford, Massachusetts, August 4-7, 2013
- Fungal Ecology and Taxonomy, Dr. Chin S. Yang, Prestige EnviroMicrobiology, 21 July 2012
- Master Window Installer Class, Installation Masters Institute, 20-21 June 2011
- Stucco Applications Class, Florida Concrete & Products Association, Jim Guildy, Instructor, 17 June 2011
- PGT (Window) Product Installation, PGT University, 8 December 2010.
